

Open architecture

We offer access to outside investment managers through an Open Architecture approach to building your plan's investment menu.

We realize that in today's competitive environment it is necessary to recordkeep for funds outside our fund families. To meet this need, JPMorgan Retirement Plan Services offers "Open Architecture" – the ability to recordkeep for virtually any outside fund.

Our Open Architecture approach to building a plan menu allows for more than a predetermined set of investment choices. This Open Architecture strategy stands as a proof statement of our investment flexibility.

We have established relationships with more than 140 fund distributors including:
